DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adoma in view of Wyatt.

Adoma teaches in the figures most of the elements of the claimed invention. However, Adoma fails to teach a plurality of fingers having a cantilever portion, a crooked portion, and a ridge portion attached to a first or second surface of a body whereby recordable disk medium is releasably coupled to the body. Wyatt teaches base 14, for holding a compact disk, having a central portion 15 having a series of legs 20 attached thereto. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a plurality of fingers retention means as taught by Wyatt for the clamping retention means of Adoma for the purpose releasably retain the disk more securely.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bena Miller whose telephone number is 703.305.0643. The examiner can normally be reached on Monday-Friday.
